

This program gives you a chance to feel the symbiotic relationship between Mother Nature and human beings by clearing tasks given to your team while putting yourself into a natural environment – sunlight, breeze, earth and water. This program is suitable to enhance your consciousness before your CSR activity. It is also effective as an ice breaker activity on your first day in Okinawa (your arrival date) because participants' interaction can be facilitated.

This is a treasure hunting game program, in which you look for Forest Deity while solving several tasks in the field of Yanbaru Forest; your game stage is nurtured by the subtropical marine climate which no other places in Japan has but Okinawa. You are to solve tasks in a team, to share the feeling of accomplishment, and mature your communication skills with each other. This 3-hour program is designed for you to gain much awareness regarding environment, by putting yourselves in the nature and to feel the nature with your five senses. Please make the most of your CSR consciousness with this program.
